

# PLATINUM

Five Layer Food Grade Technology

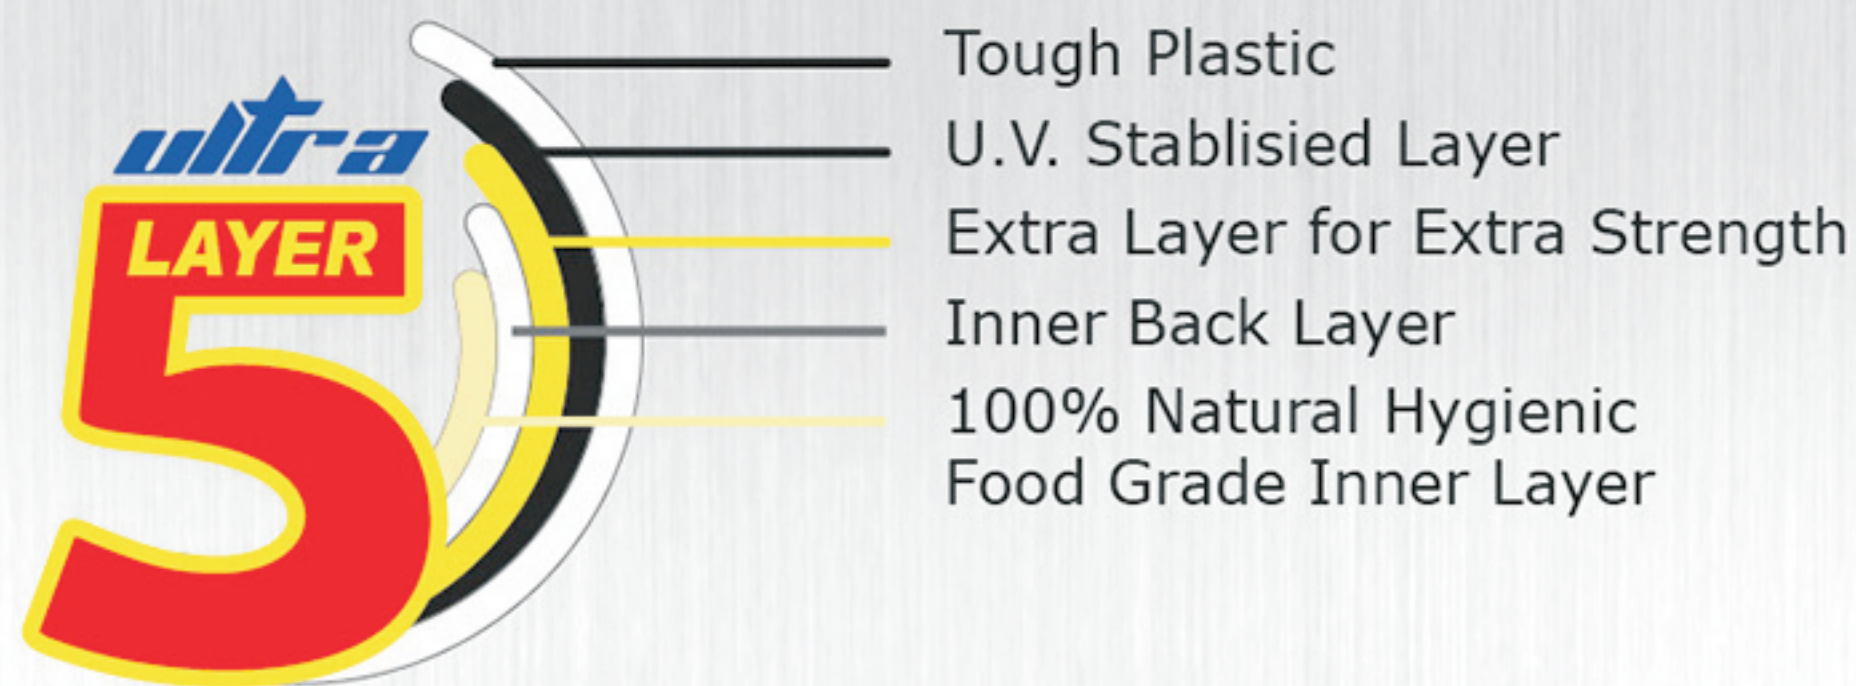

## PLATINUM Tanks:

**100% Hygienic:** Pure food grade inner layer with natural hygienic polymer that ensures the water does not get unhealthy when filling the tank.

**More Powerfully:** The additional five layers make it more robust than other tanks. Excellent Structure with bolder ribs support stability and reduce bulging when the tank is full.

**Fifth layer:** ULTRA Barrier fifth Layer with special polymer to give lifelong durability.

**Preserve water safe:** State of the art airtight threaded lid ensures that the content of tank is free from dust and insects.

## Specification of Platinum Water Storage Tanks:

Capacity (Litres)	Overall Height* (mm)	Overall Diameter* (mm)	Dia. Man-Hole* (mm)
300	950	700	420
500	1050	850	420
750	1180	950	420
1000	1250	1100	420
1500	1470	1220	420
2000	1575	1350	420

\*Dimensions may vary a little

## Our plant:

Technically advanced, high capacity plant capable of producing high quality five layer tanks with bolder ribs and supreme airtight threaded lid.

भारत में पहली बार,  
प्लैटिनम वाटर टैंक्स फूड  
ग्रेड इनर लेयर के साथ  
जो बने है कैमिकल रहित  
प्राकृतिक पोलिमेर से,  
जिससे रहेगा आपका  
पानी एक शुद्ध लेयर के  
सम्पर्क में, और आप  
रहेगे स्वस्थ।

## Feature:

- India's First 5 layer tank made from extrusion blow mould technology
- 100% Natural Hygienic Food Grade Inner Layer with Natural polymer
  - Ultra barrier fifth layer with special polymer for Extra Strength
- Anti-microbial & hygienic in nature which stops the growth of bacteria, fungi, algae
- Ultra strong and durable
- Uniform wall thickness
- 10% Extra capacity
- Threaded lid
- Extra Tough Made with High Quality Plastic
- Superior Additives to keep Stability
- U.V. Stabilized
- Cost Effective and Durable
- Ultra Sturdy Look

गजब की मजबूती... गजब की शुद्धता।
